

Mission Statement

Maverix was created for the purpose of harvesting value for our shareholders by acquiring and holding precious metals streams and royalties, and in so doing also provide significant leverage to gold and silver prices.

Our mission is to increase our underlying per share value by adding to our portfolio high quality streams and royalties that offer robust returns. We offer a mining related investment that provides exposure to metal price appreciation, and exploration and expansion potential, but without the risks associated with ongoing capital costs, operating costs and environmental liabilities. Our strong and cash generating asset base and experienced team makes Maverix an opportunistic new vehicle to grow with.
